Notification of New Products

Dear valued customer,

We are pleased to announce that we will we released the new surface temperature probes
“**Model UX series**” on 28, June, 2021.

1 . Product : “**Model UX series**”

Model UX series is temperature probes suitable for measuring the temperature of moving or rotating surfaces.

It inherits the structure of the U series, which has the function of suppressing the influence of frictional heat when contacting the moving surface.

2 . Features :

- Head part inclining in all directions (360 degree)
As the head part follows the object, it is possible to high accurate measure more easily.
- Diversified product lineup
Guard type(Teflon), Wheel type(Bearing or Teflon) can be selected according to the application.

3 . Release date : **28, June 2021**

4 . Price : Please ask our distributors or local dealers in your area.

5 . Availability : **1week**

6 . Repair : **Repairable**

Yours sincerely,

A handwritten signature in black ink, appearing to read "Hi Sakurai", is written above a horizontal line.
